Summary

A dedicated and results-oriented Data Science undergraduate with a GPA of 3.3, currently expanding expertise in Machine Learning, Data Engineering, and ETL pipelines. Proficient in Python and its data ecosystem (Pandas, TensorFlow), with a strong foundation in statistics. Additionally experienced in Full Stack Development using MERN stack, Java MVC, and Spring Boot with React. Passionate about building scalable applications and solving real-world problems through data-driven solutions

Education

Sri Lanka Institute of Information Technology (SLIIT)

2023 Nov - Present

BSc (Hons) in information technology (Specializing in Data Science)

- Maintained a **CGPA of 3.3 out of 4.00**

GCE Advance Level (A/L) | Commerce Stream | 2022

Skills

- **Programming:** Python, Java
- **Backend:** Node.js, Express.js, Spring Boot
- **Frontend:** React, Next.js, Tailwind CSS
- **Database:** MySQL, MongoDB, SQL Server
- **Data & BI Tools:** Power BI, SSIS, SSAS, Excel
- **Core Concepts:** Data Warehousing & ETL, Statistical Analysis, Data Visualization, Full Stack Development, Database Design
- **Other Technologies:** Linux CLI, Git CLI, GitHub, Version Control, IoT Solutions (Beginner), CI/CD Pipelines (Beginner – Git-based workflows, VS Code, Power BI, Excel, Android Studio, Ubuntu, R Studio.

Projects

AML Data Warehouse & Business Intelligence System

2025(February)- 2025(April)

Technologies and Tools: SSMS, SSIS, SSAS, Power BI, Excel, Python

Designed a Star Schema data warehouse and built ETL pipelines with SCD Type 2 for historical tracking
Developed SSAS OLAP cube and Power BI dashboards, implementing an accumulating fact table for transaction lifecycle analysis

Project Link: [GitHub](#)

Statistical Analysis: Learning Engagement

2025(February)- 2025(March)

Technologies and Tools: Python, R, Excel, Statistical Modelling

Performed data preprocessing, visualization, and correlation analysis on engagement data
Applied hypothesis testing and multiple linear regression to identify key predictors and evaluate data limitations

Project Link: [GitHub](#)

Campus-360 - Smart Campus Management System

2026(February)- 2026(April)

Technologies and Tools: MySQL, Spring Boot, REST API, Vite React, GitHub, Postman, OAuth2.0.

Developed RESTful APIs using Spring Boot and built a responsive React frontend with modern UI
Implemented secure OAuth2.0 authentication, integrated MySQL database, and enabled real-time notifications with Gmail integration

Project Link: [GitHub](#)

Farm-Nex - Smart Farm Management System

2025(June)- 2025(September)

Technologies and Tools: MongoDB, Express-js, React, GitHub, Postman, JWT-Auth, Stripe, IOT Sensors.

Developed a full-stack MERN application integrating IoT sensors for soil moisture monitoring
Implemented secure JWT authentication, Stripe payment system, and OTP verification with email-based OTP notifications

Project Link: [GitHub](#)

Speed-Wheels – Online Vehicle Rental System

2025(March)- 2025(May)

Technologies and Tools: MySQL, Java, html, JDBC, Tailwind CSS, Postman, JWT Auth, OOP Concept

Developed a CRUD-based vehicle rental system using Java with real-time database integration via JDBC
Implemented booking management, role-based access (Admin/User), and applied core OOP principles (inheritance, encapsulation)

Project Link: [GitHub](#)
